SPECIFICATION

Title: MEFANET Journal

Short title: Mefanet J

ISSN: 1805-9163 (printed version), 1805-9171 (online)

Publisher: Facta Medica, s.r.o., Srbská 2186/19, 612 00 Brno, Czech Republic

Language: English

Website: <http://mj.mefanet.cz/>

Periodicity: twice per year

Subscription and distribution: freely available online, distributed to institutions participating in the MEFANET project

Number of impressions: 400 copies

Size: 188 x 267 mm

Paper: cover – chalk matte paper 250 g/m²,
inside pages – chalk matte paper 90 g/m²

Binding: V2, softback

Print: 4/4 colours

JOURNAL FOCUS AND OBJECTIVES

The MEFANET Journal is a peer-reviewed journal which aims to present the latest knowledge and observations in the area of medical informatics, and in the employment of modern information technology in medical education. In connection with the activities of the network of Czech and Slovak faculties of medicine and faculties of health sciences, the MEFANET journal provides a space for sharing experience with e-learning tools, multimedia and simulations in the education of health professionals.

Target group of the journal: teachers and students at faculties of medicine and faculties of health sciences, experts dealing with medical informatics.

Types of articles

- Original articles, reviews (peer-reviewed)
- Comments, editorial items

JOURNAL INDEXING

The MEFANET Journal has been indexed in the following databases of scientific journals:

- ERIH PLUS
- Index Copernicus
- Google Scholar
- Bibliografia medica Českoslovaca
- Bibliografia medica Slovaca

EDITORIAL BOARD

Editor-in-chief

Daniel Schwarz, PhD (Institute of Biostatistics and Analyses, Faculty of Medicine at Masaryk University)

Honorary members of the Editorial Board

Ladislav Dušek, PhD (Institute of Biostatistics and Analyses, Faculty of Medicine at Masaryk University)

Vladimír Mihál, MD, PhD (Faculty of Medicine at Palacky University in Olomouc)

Aleš Ryška, MD, PhD (Faculty of Medicine in Hradec Kralove at Charles University in Prague)

Stanislav Štípek, MD, PhD (1st Faculty of Medicine at Charles University in Prague)

Members of the Editorial Board

Panagiotis Bamidis, PhD (School of Medicine at Aristotle University of Thessaloniki)

Lukáš Bolek, MD, PhD (Faculty of Medicine in Plzen at Charles University in Prague)

Ivana Bóriková, PhD (Jessenius Faculty of Medicine in Martin at Comenius University in Bratislava)

Jitka Feberová, MD, PhD (2nd Faculty of Medicine at Charles University in Prague)

Radu Iliescu, MD, PhD (Grigore T. Popa University of Medicine and Pharmacy)

Jiří Kofránek, MD, PhD (1st Faculty of Medicine at Charles University in Prague)

Martin Komenda, MSc (Institute of Biostatistics and Analyses, Faculty of Medicine at Masaryk University)

Jaroslav Majerník, PhD (Faculty of Medicine at Pavol Jozef Safarik University in Kosice)

Andrea Pokorná, PhD (Faculty of Medicine at Masaryk University)

Jarmila Potomková, MSc, PhD (Faculty of Medicine at Palacky University in Olomouc)

Terry Poulton, MD, PhD (St George's, University of London)

Petr Štourač, MD, PhD (Faculty of Medicine at Masaryk University)

Čestmír Štuka, MSc, MBA, PhD (1st Faculty of Medicine at Charles University in Prague)

Martin Vejražka, MD, PhD (1st Faculty of Medicine at Charles University in Prague)

REASONS FOR PUBLISHING IN THE MEFANET JOURNAL

1. The journal has a clearly defined target group of readers – teachers and experts dealing with the use of modern information technology in medical education, and in medicine in general.
2. A direct connection with the MEFANET network ensures a full coverage of all Czech and Slovak universities participating in the education of health professionals.
3. The journal has been indexed in both national and international databases. The published articles can be reported to the Register of Information on Results (RIV) within the J_{neimp} category (this applies for authors from Czech research institutes and universities).
4. The professional level of the journal is ensured by an independent peer review process, which is obligatory for each article intended to be published as an “original article” or a “review”.
5. The editors closely cooperate with authors in the process of article preparation for publication. The electronic version of the article is usually available within two weeks after the article admission for publication.
6. The presented results are easily available for international audience, because articles are published in English, and because the electronic version of the journal is freely available.
7. Supplementary information and materials (such as multimedia files, scripts, codes, etc.) can be published in the electronic version of the journal.
8. Apart from professional articles, popularisation and information materials (such as reports from conferences, courses and other interesting topics) can also be published in the journal.
